

Are these your teeth?

crowding

not enough room for the teeth

spacing

spaces between the teeth

class II/overjet

protruding upper teeth; "buck teeth"

class III

protruding lower teeth; "underbite"

deep bite

upper front teeth hide lower teeth

open bite

back teeth are together but space is present between the front teeth

midline shift

center of upper front teeth and center of lower teeth don't line up

crossbite

upper teeth fit inside lower teeth

Straighter Teeth

Healthier Gums

Easier Cleanings

The hygienic benefits of Invisalign

It's removable for good hygiene.

You can brush and floss normally, which can help prevent tooth decay and gum disease. Some orthodontic appliances, like braces, can cause gingivitis (usually reversible once the braces are removed.)¹

Your gum health may improve.

Research has shown that periodontal tissue health may improve with use of Invisalign Aligners during your orthodontic treatment.²

You can still eat what you want.

Because the Aligners are removable you don't have to worry about what you eat.

Cleanings are quicker and easier than with traditional orthodontics.

Invisalign has proven to be effective in both clinical research and in practices nationwide.

Over a quarter million people are already smiling more thanks to Invisalign.

Straighter teeth can lead to:

Healthier Gums

Properly positioned teeth are easier to brush and floss than teeth that are crowded, crooked, or spaced too far apart.

Properly aligned teeth can help gums "fit" tighter around them¹, which may lead to better periodontal health.

Easier Cleanings

With maintenance of good oral hygiene, the chances of having plaque retention, tooth decay, and periodontal (gum) disease can be reduced.

Improved Chewing and Speech

In some instances, speech problems may result from poorly positioned teeth and jaws.

Correction of the bite can help improve chewing and speech.

Decreased Risk of Dental Trauma and Abnormal Wear

Properly aligned teeth are less stressful on the supporting bone and jaw joints.

More Beautiful Smiles

Straightening your teeth with Invisalign will make you feel less self-conscious and more confident.
